

DOCUMENT NO.	D139	DATE	09/02/26
VERSION	24	AUTHOR	S MATTHEWS

REACH Compliance Declaration

Holroyd Components Ltd continues to recognise **European Regulation (EC) No. 1907/2006** concerning the **Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH)**, which entered into force in June 2007.

We have reviewed the latest updates to the Regulation and confirm that, based on information currently provided by our supply chain, **none of the 253 substances (as of 04.02.2026) listed on the candidate list of Substances of Very High Concern (SVHC) or Authorisation List (Annex XIV)** are present in our products in concentrations exceeding the applicable threshold of **0.1% w/w**, in accordance with **Article 33 of REACH**.

Where relevant, Holroyd Components Ltd fulfils its obligations under **Article 33** by ensuring that sufficient information is available to allow the safe use of articles and by committing to provide information on the presence of SVHCs to customers upon request.

As a downstream user, we have contacted our suppliers, who have confirmed that they, or their suppliers, have fulfilled their registration obligations for substances supplied under REACH and do not anticipate issues affecting the continued supply of materials. Any relevant new information received will be communicated as it becomes available.

Annex XVII – Restrictions on the Manufacture, Placing on the Market and Use of Certain Dangerous Substances, Mixtures and Articles

Entry 27 – Nickel

CAS No 7440-02-0 / EC No 231-111-4 and its compounds

Nickel is listed in Annex XVII of the Regulation. Nickel is present in resistance wire and foil, thermocouple wire, various fixings, components, connectors, and supply leads. It is not envisaged that these items are used in a manner that would result in direct and prolonged contact with the skin.

Labels on products containing nickel do not include hazard or warning symbols under Article 23. Users are responsible for determining whether their specific application contravenes the restrictions laid out in the Regulation. The restriction conditions are reproduced below:

Conditions of restriction

- Shall not be used:
 - in post assemblies which are inserted into pierced ears and other pierced parts of the human body unless the rate of nickel release is less than $0.2 \mu\text{g}/\text{cm}^2/\text{week}$;
 - in articles intended to come into direct and prolonged contact with the skin, such as earrings, necklaces, bracelets, rings, wrist-watch cases, fasteners, rivets, and zippers, where the rate of nickel release exceeds $0.5 \mu\text{g}/\text{cm}^2/\text{week}$;
 - in articles referred to in point (b) with non-nickel coatings unless such coatings ensure compliance with the release limit for at least two years of normal use.
- Articles covered by paragraph 1 shall not be placed on the market unless they comply with these requirements.
- CEN standards shall be used as test methods for demonstrating conformity.

Entry 6 – Asbestos Fibres

CAS No 1332-21-4 and other asbestos-related CAS numbers

Asbestos fibres are listed in **Annex XVII Entry 6** and are **prohibited** from being manufactured, placed on the market, or used, whether intentionally added or present in articles.

Holroyd Components Ltd confirms that **asbestos is not intentionally used, incorporated, or present** in any of our products, materials, or components. Our suppliers have confirmed compliance with Annex XVII Entry 6, and appropriate due diligence measures are in place to prevent the use or supply of asbestos-containing materials.

This declaration is made in good faith and reflects information available to Holroyd Components Ltd from its manufacturing operations and supply chain at the date of issue.
