## **Waste Electrical and Electronic Equipment Policy Statement (WEEE)**

The UK Waste Electrical and Electronic Equipment (WEEE) 2013 Regulations (available online) require the UK to maximise the separate collection, reuse and recycling of WEEE. The UK WEEE Regulations applies to all Electrical and Electronic Equipment (EEE) placed on the UK market that are covered by the scope of these Regulations.

### **B2B Producer obligations – registration and labelling**

Under the UK WEEE Regulations, “Producers” are required to mark all relevant EEE with a “crossed-out wheelie bin” symbol to remind consumers not to discard WEEE in the domestic waste stream. Holroyd Components Ltd encourages all its customers to make note of this symbol and avoid putting any WEEE in your domestic waste bin(s) or container(s)

Holroyd Components Ltd supports the reuse and recycling of WEEE as there are several environmental benefits of doing so, such as reduction of raw material and energy usage, prevention of landfill, prevention of hazardous and/or toxic materials present in some WEEE contaminating the environment.

As a Producer under the UK WEEE Regulations, Holroyd Components Ltd complies with its Producer Obligations by being registered as a Member of the Wastecare WEEE Producer Compliance Scheme and obtaining the WEEE Producer Registration Number **WEE/AX4693XC**

Wastecare WEEE producer compliance scheme is operated by Wastecare Compliance Plc, registration number 06043169. The Scheme is approved by the Environment Agency, registration number WEE/MP3538PZ/SCH

In order to comply with regulations, Holroyd Components Ltd provides two options to our customers for when our products eventually become waste:

The customer can choose to appropriately dispose of the waste, via their chosen contractor.

The customer can choose to contact Holroyd Components Ltd to arrange for unwanted product to be collected. We will then arrange for our Compliance Scheme Operator to take the waste. We do however reserve the right to make a charge at that time as we did not charge at the time the Holroyd Components Ltd parts were purchased.

### **Distributor obligations – B2C EEE**

The WEEE Regulations require distributors of B2C (Household EEE) to maximise the separate collection and environmentally friendly processing of WEEE. Distributors (including retailers) are required to provide a “take-back” system which allows customers the opportunity to return their old EEE items free of charge, when supplying new EEE on a like-for-like basis.

As a responsible retailer, Holroyd Components has met these requirements by offering all customers buying new B2C EEE items free take back of their old electricals on a like for like basis.

Under the UK WEEE Regulations, “Producers” are required to mark all relevant EEE with a “crossed-out wheelie bin” symbol to remind consumers not to discard WEEE in the domestic waste stream. Holroyd Components Ltd encourages all its customers to make note of this symbol and avoid putting any WEEE in your domestic waste bin(s) or container(s)

Holroyd Components Ltd supports the reuse and recycling of WEEE as there are several environmental benefits of doing so, such as reduction of raw material and energy usage, prevention of landfill, prevention of hazardous and/or toxic materials present in some WEEE contaminating the environment.

As a Producer under the UK WEEE Regulations, Holroyd Components Ltd complies with its Producer Obligations by being registered as a Member of the Wastecare WEEE Producer Compliance Scheme and obtaining the WEEE Producer Registration Number **WEE/AX4693XC**

Wastecare WEEE producer compliance scheme is operated by Wastecare Compliance Plc, registration number 06043169. The Scheme is approved by the Environment Agency, registration number WEE/MP3538PZ/SCH
